

## Customer

Founded in 1990, **NOMOS Glashütte** today is a world-famous watch manufacturer with offices in Berlin and New York and about 250 employees. Since 2014 the manufactory has been producing its own in-house assortment of movements, the NOMOS Swing System, which makes it independent of Swiss suppliers. The clean and reduced design of the watches from NOMOS Glashütte follows the principles of the German Werkbund (German Association of Craftsmen) and makes these timepieces unique. The model Tangente is already seen as a timeless classic by connoisseurs and collectors.

## Concept / Requirements

- **Security:** Secure networking of individual sites with sufficient bandwidth
- **Flexibility:** Centralized management with versatile configuration options
- **Investment protection:** Use of high-quality products with long-lasting support

## Solution

- **Site connectivity** for 3 factories in Glashütte, Germany, by **VPN connection**
- **Wireless point-to-point link** for connecting the individual production sites to the company network
- **Wider Wi-Fi coverage** for employees and visitors

## Benefits

- **Security** from encrypted VPN connectivity
- **Cost savings** thanks to wireless point-to-point links without expensive construction work or DSL
- **Simplified administration** thanks to the central switching platform
- **Increased productivity** and **better control** over production facilities
- **Sustainability and investment protection** thanks to easy scalability and expansion of the network

## Infrastructure

1 x WLAN controller  
LANCOM WLC-4025+

2 x Gigabit switch  
LANCOM GS-2326P

5 x Gigabit switch  
LANCOM GS-2352P

17 x access point  
LANCOM L-460agn
